

Cookies Policy (effective from 20/10/2020)

A cookie is a small file which asks permission to be placed on your computer's hard drive. Once you agree, the file is added and the cookie helps analyse web traffic or lets you know when you visit a particular site. Cookies allow web applications to respond to you as an individual. The web application can tailor its operations to your needs, likes and dislikes by gathering and remembering information about your preferences.

We use traffic log cookies to identify which pages are being used. This helps us analyse data about web page traffic and improve our website in order to tailor it to customer needs. We only use this information for statistical analysis purposes and then the data is removed from the system.

Overall, cookies help us provide you with a better website, by enabling us to monitor which pages you find useful and which you do not. A cookie in no way gives us access to your computer or any information about you, other than the data you choose to share with us.

You can choose to accept or decline cookies. Most web browsers automatically accept cookies, but you can usually modify your browser setting to decline cookies if you prefer. This may prevent you from taking full advantage of the website.

MEASURING WEBSITE USAGE (VIA GOOGLE ANALYTICS)

We measure how people visit the site to improve the experience for our visitors as part of an ongoing process. We use Google Analytics to do this. Google Analytics keeps track of the pages you visit, how long you stay on each section of the site and what links you click on. Google Analytics does not store any personal details about you and we do not allow Google to share any analytics data gathered.

Google Analytics sets these cookies in order to measure this.
